

GOOD SHOWINGS IN NEW MEXICO

Roswell, N. M., Jan. 13.—During the past few days all has been encouraging in these oil fields. The new well, 12 miles north of Roswell, in Eddy county, is now producing oil. During the past ten days it has produced 100 barrels of oil. This well is being drilled to a depth of 1,000 feet. It is being drilled by the Brown well, which is now being drilled to a depth of 1,000 feet. It is being drilled by the Brown well, which is now being drilled to a depth of 1,000 feet. It is being drilled by the Brown well, which is now being drilled to a depth of 1,000 feet.

The Brown well, near Dugan, in Eddy county, is on a new ramp. This week this well produced 100 barrels of oil. It is being drilled to a depth of 1,000 feet. It is being drilled by the Brown well, which is now being drilled to a depth of 1,000 feet. It is being drilled by the Brown well, which is now being drilled to a depth of 1,000 feet.

Because of bad condition of the casing, drilling has been slow during the past three months. There is much talk of abandoning the well altogether and starting another hole near it.

The Illinois Producers' well, which is the deepest test in the Permian valley, is at a depth of 2,100 feet. There is a good showing of oil and at times the gas pressure has registered 500 pounds.

The first well of the National Exploration company is at a depth of 1,000 feet. Two excellent showings of oil and gas have been encountered. The geological report on this well, as prepared by Decey Hager and A. Edmund Hochstetler, calls for oil to be found in paying quantities at a depth of 2,000 or 2,500 feet.

To Start Drilling.—The second well of the National Exploration company has been located at Orchard Park 12 miles south of Roswell. Drilling is to start within a few days. This company is under contract to drill two more wells in this vicinity, which are to be located and started within the next future. Three wells are being drilled in

SHALLOW WELL FLOW ENLARGED

Brownwood, Tex., Jan. 13.—W. D. Gully, well known oil operator in the Brown county shallow field, has proved that, with careful handling, shallow wells are long lived. W. D. Gully owns the two shallow wells on the Stewart tract, a mile west of Brownwood, which were drilled in August, 1917. The production of these wells gradually decreased until during the past fall the wells made only one barrel of oil a day.

Gully had each well thoroughly cleaned out and new pumping equipment installed, with the result that the wells are again making 15 barrels daily steady production.

Other operators in the field are following Gully's lead and within a short time it is believed that the standard of the field will be raised to its former high level.

During the past year, however, under the conditions that prevailed during that time, the shallow pool yielded more than 10,000 barrels. During this year it is expected to increase.

Roswell county and two deep tests are going down in Curry county. A number of Fort Worth oil men are here and are blocking acreage north of Roswell and plan to drill a number of deep tests.

Practically every acre of land in Curry, Eddy, Lea, Lincoln, Roosevelt, and DeBakey counties are now under lease. This includes state lands.

OKMULGEE COMPLETION.—Tulsa, Okla., Jan. 13.—In spite of the fact that operations are handicapped by bad weather prevailing throughout the different oil fields of the state, several good wells have been completed during the past ten days. Fifteen hundred barrels of new production, together with the completion of two good gas wells, put Oklahoma county fields to the front.

STATE SEEKS TO RECOVER OIL LAND IN RED RIVER BED

Austin, Tex., Jan. 13.—The 55th district court suit has been filed by the attorney general on behalf of the state against the Burkh-Divide Oil company No. 1, the Burkh-Divide No. 2 and the Double-P Oil company and their officers and employees, to recover about 500 acres of valuable oil land situated in the bed of Red river, in Wichita county, about 18 miles northwest of Wichita Falls and near the famous Durfee survey. While this suit does not involve the boundary dispute between Texas and Oklahoma, the land is situated in a part of the territory embraced in the land in controversy. The state is asserting title to the land and seeks also to enjoin the defendants, who are holding either under federal placer mining claims or under permits from the state of Oklahoma.

The court granted a temporary injunction restraining those holding claims or permits to the land under the Texas mineral permit law. The defendants also are enjoined from trespassing upon any of such land, from placing derricks on the land or attempting to take any oil or other minerals therefrom.

WEST TEXAS WELLS.—San Angelo, Tex., Jan. 13.—Oil showings have been found in the C. E. Menzies deep test, which is drilling at 2,500 feet in a black lime formation. The lime formation was encountered at 2,500 feet, at which depth the first traces of oil were seen. This test is on the Elgin ranch, in Pecos county.

Good progress is being made on the Marathon Oil and Gas company's well in Brewster county. The No. 1 was spudded in during December. The No. 2 was spudded in several days ago.

On the White & Baker ranch, in Pecos county, the Texas Top Oil company's rig is up. Preparations are being made to start the well at once.

DRILLING AT BONHAM.—Bonham, Texas, Jan. 13.—The machinery for the No. 1 to be drilled by the Elkey interests near Bonham in Pecos county has arrived. Several Wichita Falls operators are in the market for about 10,000 acres of land, possibly in this district, in which they propose to drill to a depth of 3,000 feet.

RIG OIL DEAL.—Wichita Falls, Tex., Jan. 13.—The Invader Oil and Refining company has just closed the biggest oil deal this year. It bought the United Producers' lease, in the Burkh-Divide district, for \$1,000,000. The lease covers 21 acres, with ten producing wells, making it a big bargain, in the heart of the field.

COMPANIES REORGANIZED.—Amarillo, Tex., Jan. 13.—The Amarillo Gas company, owners of the big gasers brought in in this district during the past few months, and the Panhandle Pipe Line company have undergone reorganization, leading Amarillo business men are directors of both concerns.

ROAD TO BRECKENRIDGE.—Breckenridge, Tex., Jan. 13.—The grade for the Wichita Falls, Ranger & Fort Worth railroad has been completed up to one mile from here. With the completion of this road, Breckenridge will grow rapidly in size and population.

Cremery Dairy Co.—For milk, cream and buttermilk. Phone 2173.—Adv.

Combining Won't Rid Hair of Dandruff

The only sure way to get rid of dandruff is to dissolve it, then you destroy it entirely. To do this, get about four ounces of ordinary liquid ammonia; apply it at night when retiring; use enough to moisten the scalp and rub it in gently with the finger tips. Do this tonight and by morning most if not all of your dandruff will be gone and three or four more applications will completely dissolve and entirely destroy every single grain and tract of it, no matter how much dandruff you may have.

You will find, too, that all itching and digging of the scalp will stop at once, and your hair will be fluffy, lustrous, glossy, silky and soft, and look and feel a hundred times better. You can get liquid ammonia at any drug store. It is inexpensive and never fails to do the work.—Adv.

OUT O' LUCK

Never mind! Just take Cascarets if Bilious, Constipated

Everyone must occasionally give to the bowels some regular help or else suffer from constipation, bilious attacks, stomach disorders, headache, but do not whip the bowels into activity with harsh cathartics.

What the liver and bowels need is a gentle and natural tonic, one that can constantly be used without harm. The gentlest liver and bowel tonic is "Cascarets." They put the liver to work and cleanse the colon and bowels of all waste, toxins and poisons without griping—they never sicken or inconvenience you like Calomel, Salts, Oil or Purgatives.

Twenty-five million boxes of Cascarets are sold each year. Cascarets work while you sleep. Cascarets cost but little.—Adv.

14 Years Ago Today

From The Herald of This Date, 1900

THE most disastrous accident in the history of the El Paso Electric Railway company occurred yesterday afternoon, when eastbound car No. 21, of the Boulevard line, and westbound Highland Park car came together with a crash in a head-on collision near the corner of Boulevard and Cotton avenue.

Chief engineer P. H. Newell and supervising engineer H. H. Hall, accompanied by field engineer J. L. Ehead, returned this morning from a trip of inspection to the Leach and Eagle dam area and a conference with the water users at Las Cruces. Mr. Newell and Mr. Hall will be guests of honor this evening at the St. Regis at a dinner.

Heavier floods are expected this spring than ever before, owing to the snow in the mountains. Between six and eight feet of snow cover the mountains, which will melt a lot of water in the spring.

The latest name mentioned in connection with the state legislature is that of Judge W. M. Caldwell. Ballots are being cast this afternoon by water users of the El Paso valley in favor of closing a contract between the United States government and the water users' association.

Aaron Goodman, president of the Lion Grocery company, is recovering from injuries received in an accident at his residence, 708 North Oregon street, a few days ago.

J. H. National, who purchased the sheep interests of Hild Bros. of Albuquerque.

EXTENSIONS IN LOUISIANA OIL FIELD ARE ANNOUNCED

Shreveport, La., Jan. 13.—Gilliland and Foster have secured 10,000 barrels well in the Claiborne field—their Shaw No. 8, in section 20-21-1, reduction was found at 2,225 feet.

The Ohio Fuel Oil company has brought in the Norton No. 1 in section 12-13-1, extending the Homer pool, northwest. The well is flowing 200 barrels from 2,400 feet.

In the Homer field the Stumms Oil company has completed the McClure No. 1 in section 12-13-1, it is flowing 15,000 barrels from 2,000 feet.

Gilliland and Foster will add more 12,000 barrel storage tanks to the seven already completed on their holdings.

The Bull Barro field of De Soto Parish has been extended one mile to the southwest by the completion of Clark and Trever's well, Blaque No. 1, in section 17-2-3 at a depth of 2,000 feet. The well is making about 20,000 cubic feet of gas and considerable oil.

San Angelo, Tex., Jan. 13.—Oil showings have been found in the C. E. Menzies deep test, which is drilling at 2,500 feet in a black lime formation. The lime formation was encountered at 2,500 feet, at which depth the first traces of oil were seen. This test is on the Elgin ranch, in Pecos county.

"Production From the Start"

Ye TOWNE GOSSIP

Registered U. S. Patent Office.
By K. C. B.

HE WAS a taxi driver.
AND HE had a grouch.
JUST LIKE bankers have.
AND MERCHANTS have.
AND MINISTERS have.
EVERY ONE in a while.
AND A MAN.
PICKED HIM UP.
AND GAVE him the number.
AND GAVE him the street.
AND HE sat in his seat.
ALL DOUBLED UP.
AND DROVE AWAY.
AND GOT out at trucks.
AND TURNED short corners.
ON A couple of wheels.
AND SCARED the passengers.
ALMOST to death.
AND WOULDN'T slow up.
WHEN HE was asked.
AND WHERE he was going.
WAS WHERE a family of six.
LIVED ALL together.
IN A couple of rooms.
AND THEY had no fuel.
AND LITTLE food.
AND THE passenger
HAD GONE to investigate.
AND THAT'S what he found.
AND HE came down stairs.
AND BACK to the taxi.
AND THEY drove away.
TO A grocery store.

AND THE driver sat.
ALL DOUBLED UP.
WITH his terrible grouch.
AND THE taxi stopped.
IN FRONT of the store.
AND THE passenger.
WENT INSIDE.
AND AFTER a while,
HE CAME out again.
AND HIS arms were full.
AND HE asked the driver.
TO GO INSIDE.
FOR ANOTHER load.
AND THE driver was sure.
BUT HE went inside.
AND GOT his load.
AND THEY drove back.
TO THE place again.
AND THE passenger
TOOK HIS load.
AND THE grouch driver.
TOOK HIS load.
AND THEY went upstairs.
AND THE mother was there.
AND THE kids were there.
AND THE mother cried.
AND ON the way back.
THE TAXI driver.
SAT RIGHT up straight.
AND WHEN he was through.
HE WOULDN'T take any pay.
FROM THE passenger.
I THANK YOU.
